ARTHUR L. MALLORY
Commissioner of Education

LINDA L. WARD
Executive Secretary

Members of the General Assembly
State of Missouri

Ladies and Gentlemen:

The State Board of Education herewith submits its One Hundred Thirty-Fifth Report of the Public Schools of the State of Missouri. This report, prepared in compliance with Section 161.092, Missouri Revised Statutes, covers the school year ending June 30, 1984.

We hope the information contained in this report will be of interest and assistance to you as you consider the needs and major problems of the public schools of the State of Missouri.

Respectfully,

Robert L. Welling

Robert L. Welling
President, State Board
1983-84

Linda L. Ward
Secretary, State Board of Education

The State Board of Education was established in its present form by the Missouri Constitution of 1945. The State Board of Education consists of eight lay citizens appointed by the Governor with advice and consent of the Senate. Article IX, Section 2(a) also states that no more than four members of the Board may belong to the same political party. State Board members are appointed for eight-year terms which are arranged so that only one term expires each year. The Board elects its own officers.

The responsibilities of the State Board of Education extend from preschool through postsecondary and adult education programs. These responsibilities include:

- Establishment of policies for the leadership, service and regulation of public education. These policies are administered by the Missouri Department of Elementary and Secondary Education.
- Operation of the State School for the Blind and the State School for the Deaf.
- Operation of State Schools for Severely Handicapped Children.
- Classification of schools and certification of teachers.
- Administration of vocational education, vocational rehabilitation and veterans' education programs.
- Administration and supervision of programs under the Elementary and Secondary Education Act of 1965 and other federal programs.
- Apportionment of state moneys.
- Publication of laws relating to schools.
- Collection and publication of information which reflects continuously the condition and management of the state's public schools.

Part I

Report of the Year Completed

The Year in Review

By Arthur L. Mallory,
Commissioner of Education

"To everything there is a season, and a time to every purpose under the heaven." So it was for King Solomon, and so it was for public education in the State of Missouri during the 1983-84 school year. Education was in the forefront of public attention throughout the year. It was a remarkable, memorable year indeed — one which included several events likely to bring fundamental change to Missouri's public schools in the future.

In April of 1983, the National Commission on Excellence in Education published its landmark report, *A Nation at Risk*. Highly critical of America's public schools, the report generated an unprecedented wave of debate and concern about education — a wave that literally swept the country. Perhaps most notable about *A Nation at Risk* and the reaction it created was the fact that the "rising tide" of concern about the quality of education in America did not subside quickly. As a result of the commission's report, education became a top political issue at every level. It was not just another blue-ribbon study, destined to gather dust on scholars' shelves. Because the debate and controversy aroused by the report continued for months, *A Nation at Risk* effectively set the tone for the 1983-84 school year.

In short, "excellence" and "reform" became the new watchwords in Missouri and other states throughout the country. As the school year began, the prevailing attitude seemed to be, "something must be done to reform and improve public education." Missouri, I'm proud to say, was ready to respond in a positive, constructive way.

Reaching for Excellence

On Aug. 5, 1983, Governor Bond proclaimed 1983-84 as the "Year of the Public Schools" in Missouri. Planning for this special event had begun before *A Nation at Risk* captured the headlines, but the renewed public interest in education made the statewide Year of the Public Schools observance especially timely and valuable for Missouri.

"Excellence" and "reform" became the new watchwords for public education in Missouri during 1983-84.

The theme of the year-long campaign was "Missouri Public Schools: Reaching for Excellence." This theme was developed and adopted during the summer of 1983 by an informal coalition of state and local educational organizations.

Under the leadership of the State Board of Education and the Department of Elementary and Secondary Education, a special effort was made to encourage noneducation groups to take part in and support the Reaching for Excellence campaign. As a result, a wide variety of organizations endorsed and supported the Year of the Public Schools, including: other state agencies, the League of Women Voters, the Missouri Chamber of Commerce, Scouts, and other business and civic groups. The Missouri Congress of Parents and Teachers (PTA) and the Missouri School Public Relations Association played an especially important role in coordinating the Year of the Public Schools project and encouraging local school districts to develop their own projects around the Reaching for Excellence theme.

The campaign had three primary goals:

- To promote community awareness and understanding of the role of public schools and of current issues affecting public education; and to make plans and suggestions for needed improvements in Missouri's public schools.
- To develop effective school community partnerships as a means of encouraging excellence.
- To recognize excellence in public schools at the local and statewide levels.

The Year of the Public Schools was a "first" for Missouri. Never before had there been a coordinated statewide effort to focus attention on the importance of public education and to stimulate constructive discussion about ways of improving our school system. The response to this campaign, both at the state and local levels, was remarkably positive, and it helped create a new level of public awareness about important issues and problems facing Missouri's public schools.

The spirit of the Reaching for Excellence campaign and renewed public awareness about education helped set the stage for significant action during 1983-84. There is no question that "the time was right" for educational reforms to be adopted. As a result, local school districts, the State Board of Education and the General Assembly all took steps during 1983-84 to upgrade educational standards and expectations.

Action for Excellence

In the wake of *A Nation at Risk*, many states have taken aggressive action — through new legislation and state board of education policies — to improve educational standards. In keeping with this trend, the Missouri Legislature and the Missouri State Board of Education both enacted significant measures during 1983-84 to reform and improve public education.

The General Assembly approved several measures with long-range impli-

cations for students, parents, teachers, school districts and teacher training institutions. These included:

•A law which eliminates life teaching certificates after September 1, 1988. Endorsed by the State Board of Education, this law will require schoolteachers in the future to periodically renew their certificates. It will require classroom teachers in public schools to continue their professional development and to acquire new knowledge and skills. This measure also is likely to have a significant impact on inservice training for teachers in the future.

This law creates a new state-level advisory body (effective July 1, 1985) known as the "Missouri Advisory Council of Certification for Educators." This 25-member group, to be appointed by the State Board of Education, must include 15 active classroom teachers. The council will advise the State Board of Education in the establishment of standards for the training, certification and recertification of teachers and administrators in the state. With the elimination of permanent teaching certificates, this group will play an important role in defining educational and certification requirements for Missouri educators in the future.

•A law requiring all public colleges and universities in Missouri that train teachers to administer subject-matter tests to prospective high school instructors before they graduate. Under this law (effective July 1, 1987) teacher training institutions can be penalized if their students do not perform well enough on national subject-matter tests.

Enactment of this law illustrates the concern which many citizens and legislators have about assuring that Missouri has competent teachers in the future.

•A law authorizing state funds to assist school districts in expanding programs for preschool children and their parents. This bill, known as the Early Childhood Development Act of 1984, was actively supported by both the State Board of Education and Governor Bond. Although the General Assembly did not appropriate any funds to support such programs during the 1984-85 school year, the legislation represents a major step in revising statewide education policy and recognizing that children's growth and development during the preschool years are crucial to later academic success.

This bill (Senate Bill 658) authorizes state funding for three types of services for young children and their families:

1. Screening, from birth to age 4, to detect possible handicaps, health problems or learning impediments.

2. Information and assistance to help parents be more effective "teachers" for their children during the preschool years (birth to age 5).

3. Special programs for pre-kindergarten children with developmental delays.

Expanding and improving early childhood and parent education services

1983-84 Education Statistics in Brief

Number of Public School Districts	546
Fall Enrollment	
High School Districts K-12	784,086
Elementary Districts (K-8)	11,367
State Total (K-12)	795,453
High School Graduates	53,388

State Total	$1,913,231,037
Current Expenditures per ADA*	$2,675
Average School Tax Levies (After Adjustment)	
High School Districts	$3.58
Elementary Districts	3.21
Average for All Districts	3.51

**Average Daily Attendance*

in Missouri's public schools has been a major goal of the State Board of Education for more than a decade. By authorizing state assistance to encourage local schools to expand their services for children and parents during the preschool years, this new law has the potential of causing profound change and improvement in our overall educational system.

In many states, the school-reform movement has concentrated almost exclusively on measures such as raising high school graduation requirements and mandating additional tests for students and teachers. With the Early Childhood Development Act, however, I believe Missouri is leading the nation by acknowledging that education must "begin at the beginning," and by recognizing that improved preschool services for children and parents can pay tremendous dividends in terms of children's academic performance.

•The General Assembly also appropriated funds ($345,000) to enable the State Board of Education to establish a statewide "academy" for gifted students in Missouri. To be held for the first time during the summer of 1985, this program will be designed to provide a unique and intensive learning experience for some of the most academically talented youth in our state. The program also will provide leadership and model curriculum materials to assist local school districts in improving their own programs for gifted students.

In June of 1984, the State Board of Education adopted preliminary plans for conducting this special program, to be known as the "Missouri Scholars Academy." It will be held for three weeks on the campus of the University of Missouri-Columbia and will involve about 300 "rising juniors" (students who complete their sophomore year in the spring of 1985).

Similar programs for gifted students now are offered in about 10 other states. Although Missouri's first Scholars Academy will serve only a select group of students, it illustrates the growing support for gifted education in Missouri. I hope the first Scholars Academy in 1985 provides a model for expanded programs involving more students in the future.

The New Look of Missouri's High School Graduation Standards

During its March 15, 1984, meeting at Jefferson City, the State Board of Education gave final approval to revised minimum high school graduation standards. The new requirements apply to students in public high schools graduating after July 1, 1987. Thus, the new requirements affect students who began their freshman year in the fall of 1984 and who will graduate in the spring of 1988. The previous standards were adopted by the State Board of Education in 1973.

	Previous High School Grad. Standards	New High School Graduation Standards

State Board of Education's "Action Plan" Provides a Road Map for Reform

The Missouri State Board of Education played a decisive role during 1983-84 in responding to public concerns about the quality of education; reevaluating existing standards; and establishing important new goals and priorities for the future.

During the summer of 1983, the Board spent a great deal of time studying the recommendations included in *A Nation at Risk* and other prominent studies of education. Before the school year began, the Board announced its intention to consider revisions in minimum high school graduation requirements and other policies.

Following is a summary of major actions by the State Board of Education during 1983-84 to upgrade academic standards and requirements for Missouri's public schools:

•In March, the Board approved significant revisions in minimum high school graduation standards (see box). Originally proposed in November, these new requirements reflected opinions expressed during the Regional Educational Conferences. (See page 14 for a detailed summary of the conferences and the opinions expressed by participants.)

There was some opposition to the new standards from those who felt the additional requirements would cause a hardship for students wishing to take vocational courses in high school. A survey by the Department of Education, however, had shown that many school districts already exceeded the minimum requirements, and the Board felt very few students would be prevented from pursuing vocational courses.

•In a related action, the Board adopted criteria for a voluntary "College Preparatory Studies Certificate." This state-level certificate, to be awarded in addition to the regular high school diploma, is designed to provide recognition and incentive for students completing a rigorous course of studies in high school and meeting stringent achievement standards in the basic academic subjects. This certificate will be awarded for the first time in 1985 to students who qualify.

•In February 1984, the Board

adopted suggested guidelines and procedures for local school districts to use in conducting "performance based teacher evaluation," as required by a law enacted in 1983. Implementation of performance based evaluation has since become a major priority in school districts across the state, and state education officials have conducted extensive training programs to assist local teachers and administrators.

The adoption of performance based teacher evaluation is a significant achievement, and I believe Missouri is one of the leaders in the country in this effort to provide effective evaluation and assistance for classroom teachers.

•In March of 1984, the Board formally adopted a special report entitled, *Reaching for Excellence: An Action Plan for Educational Reform in Missouri*. Based on nearly six months of work and discussion, this report outlined a comprehensive program for school improvement with about 50 specific recommendations affecting all aspects of public education. Because of its importance, the complete text of the *Action Plan* is reprinted in Part II of this report. (See page 17.)

In June, in a step designed to implement one of the major recommendations included in the *Action Plan*, the Board proposed a three-year funding plan that would raise Missouri to the national average in per-pupil expenditures by 1988. The Board recommended that the General Assembly appropriate an additional $430 million in state aid for schools through the Foundation Program to achieve that goal. As a first step, the Board adopted a formal budget request seeking a $143.5 million increase in Foundation Program funding for the 1985-86 school year.

Robert L. Welling, an attorney from Warrensburg, served as president of the State Board of Education during the 1983-84 school year.

The Board stressed that substantial increases in state support for public schools are necessary, not only to compensate for stagnant state funding during the previous three years, but also to make it possible for local schools to implement many of the reform measures included in the *Action Plan*.

The *Action Plan* is a timely, ambitious and provocative statement of goals and priorities for public education in Missouri. It emanated directly from the State Board of Education's determination to develop what it called "a realistic road map — not a wish list — for school improvement."

The *Action Plan* culminated a year in which the State Board of Education was continuously active — not only in setting new policies for our public schools, but also in providing unusually forceful leadership in defining key issues and priorities. Throughout the year, for example, individual members of the Board traveled extensively in Missouri, speaking to groups of citizens and educators about school improvement, meeting with legislators and studying actions in other states.

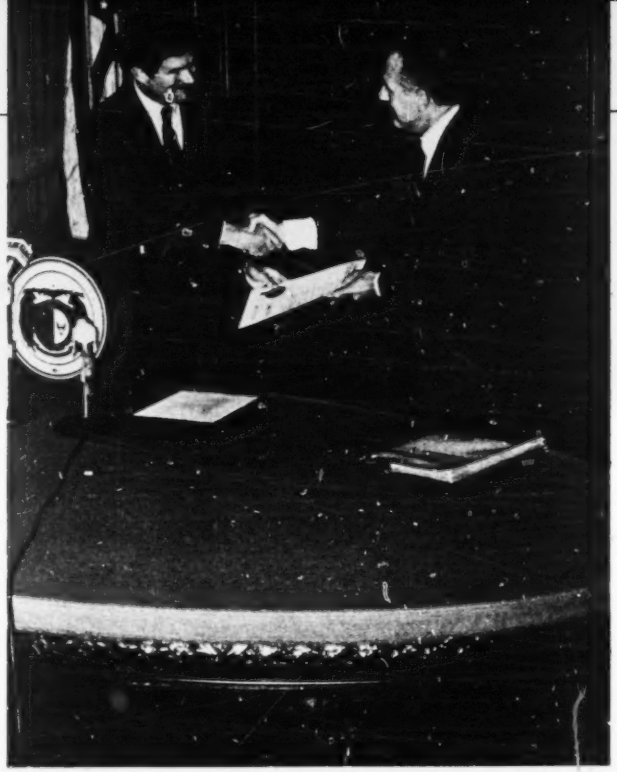
Robert Welling, president of the Board, deserves special credit for encouraging the Board to define its goals and priorities with a clear-cut *Action Plan* and for being such a strong and effective advocate of public schools. He contributed an enormous amount of time to the Board's work during the year, often at personal expense, working to make others aware of the Board's recommendations as well the need for concerted action at both the state and local levels.

Amidst all the rhetoric and debate about school reform, the 1983-84 school year was a time for Missourians to take stock and set new goals. From the schoolhouse to the statehouse, this year was a time for significant action aimed at improving teaching and learning in Missouri's public schools.

As the State Board of Education noted in its *Action Plan*, "We are in a race to reform Missouri's public schools." The race is far from finished, but we made a fine beginning this year. "Reaching for Excellence" in our schools is an ambitious goal, but I'm confident Missouri can achieve it. We must. □

On Dec. 15, 1983, the State Board of Education met with Rep. Gary Sharpe, center, (chairman) and other members of the House Select Interim Committee on Education to discuss school-reform measures being considered by the Board and legislative leaders. In 1984, the General Assembly enacted important bills related to teacher training and certification, early childhood/parent education and other programs. The State Board of Education also played an active part in the push for reform by enacting new high school graduation standards, adopting a stricter policy for the Basic Essential Skills Test (BEST) and publishing a special "Action Plan for Educational Reform in Missouri."

Highlights of 1983-84



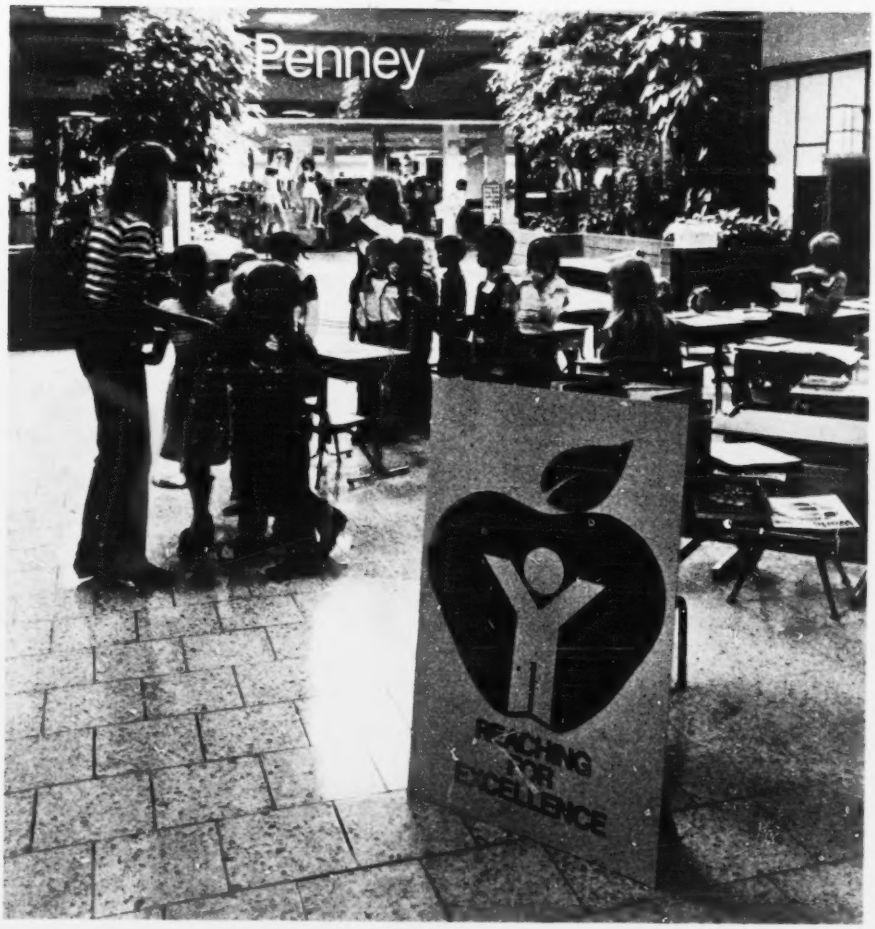
On August 5, 1983, Gov. Christopher S. Bond proclaimed 1983-84 as the "Year of the Public Schools" in Missouri. Gov. Bond, right, presents the proclamation to Commissioner of Education Arthur L. Mallory. More than 100 education and civic leaders were invited to attend the special proclamation ceremony and help kick off the yearlong event.

Dr. Burton White, above, was the featured speaker for the annual Conference on the Young Years, April 6-7, 1984, at Jefferson City. He is consultant for the exemplary "New Parents as Teachers" program, conducted by the Department of Education and four Missouri school districts.

Jeanne B. Crews, left, a third grade teacher in the Mehlville School District, was Missouri's Teacher of the Year for 1983-84.

In September 1983, Commissioner of Education Arthur L. Mallory appointed a 24-member advisory committee on performance based teacher evaluation. The group, left, met throughout the year to develop suggested guidelines and procedures to assist local school districts.

Ernest Boyer, above, president of the Carnegie Foundation for the Advancement of Teaching, addressed local school officials during an August 1983 meeting in Jefferson City. His influential study, "High School—A Report on Secondary Education," stressed the mastery of language as the key to excellence in education.



Many school districts and education groups throughout the state adopted the "Reaching for Excellence" theme to celebrate The Year of the Public Schools. In one special event designed to promote public involvement, the Jefferson City Public Schools held elementary classes for a week in the local shopping mall.

Summary of the 1983 Regional Conferences

Missourians Endorse Stiffer Educational Standards

Most Missourians favor stiffer course requirements for high school graduation, generally support the concept of "merit pay" for teachers, oppose a longer school day or school year —and are willing to pay higher taxes to fund school-reform efforts.

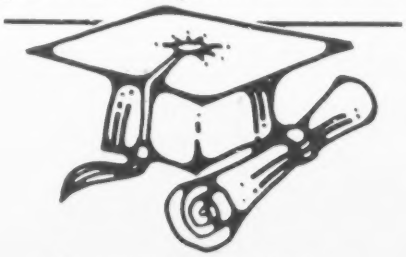
Those are some of the opinions expressed by the more than 4,000 citizens, educators and students who took part in the 1983 Regional Educational Conferences, sponsored by the Department of Elementary and Secondary Education. The 10 conferences were held across the state during September and October. The theme of the meetings was "Missouri High Schools Reaching for Excellence."

The opinions expressed by conference participants helped shape new educational standards for Missouri. The State Board of Education considered the opinions expressed by conference participants in connection with its later decisions about the Basic Essential Skills Test (BEST) and high school graduation standards.

State education officials conducted two surveys during the conferences in order to collect information about Missourians' views on high school standards and other current issues. One dealt specifically with issues such as the high school curriculum and minimum graduation standards. The second survey was more wide-ranging. It dealt with many of the recommendations made by the National Commission on Excellence in Education in its April 1983 report, *A Nation at Risk*.

Participants in the conferences included students, teachers, community leaders, school administrators, board members, parents, legislators and others.

Overall, participants gave the high schools in their communities positive ratings. The perception of Missouri high schools in general, however, was markedly lower. For example, 85% of those responding to the survey gave their local high schools a grade of "A" or "B"; 15% gave a grade of "C." When asked to grade all the high schools in Missouri, though, only 2% of the conferees awarded an "A" grade, 54% gave a "B"; 43% gave a "C."



Missouri High Schools—Reaching for Excellence

Missouri high schools are offering an appropriate number of courses in nearly all subject areas, according to a strong majority of the participants, and most Missourians seemed to be satisfied with the variety of high school course offerings available. The major concern expressed in this area involved foreign languages; half of the participants said too few foreign language courses are available.

Most participants also said that courses offered to high school students today are academically challenging. Between two-thirds and three-fourths of all respondents said English, social studies, science and math courses today are sufficiently demanding.

Following are other highlights of the 1983 Regional Conference surveys which indicate how Missouri citizens and educators feel about some of the most-frequently discussed issues in education:

•A large majority favored higher course requirements for graduation. For example, 85% of those surveyed said they believe students should be required to take three or four units of high school English. By the same majority, they favored requiring two or three units of math and science.

•Three-fourths of the respondents favored the idea of giving special certificates, in addition to diplomas, to students who excel in a college-prep program of high school studies.

•Two-thirds said all students should be required to pass the Basic Essential Skills Test (BEST) prior to high school graduation.

•Over half of the respondents said high school students should be expected to do two hours of homework per day; about one-third favored one hour of daily homework.

•75% of the participants opposed adding an hour to the current six-hour school day, and a majority voted for no change in the current state requirement for a 174-day (minimum) school year.

•71% said "the practice of paying teachers based on training and experience should be expanded to include performance."

•Opinions expressed on several questions revealed popular support for stronger, more specific educational standards. For example, 80% of those surveyed said local schools should set written academic standards for students to meet before they can be promoted. Two-thirds approved of giving state-administered tests in basic subjects at major transition points in school. Also, more than 80% of the respondents said colleges and universities should establish admission requirements based on specific courses and levels of achievement.

•97% said they would be willing to pay higher taxes for the improvement of education. □

★HEADLINES★

—A capsule summary of education-related action and events that made the news during 1983-84.

Entry Test Required for Prospective Teachers

On July 29, 1983, the State Board of Education approved a policy requiring prospective teachers to achieve certain levels on college aptitude tests in order to be admitted to a school or college of education. The Board delayed implementation of the new requirement, originally slated to become effective in 1983, until July 1, 1984, because it took longer than expected to gear up for the new testing procedure.

Under the new policy, college students must have a minimum composite score of 18 on the American College Test (ACT) or a minimum composite score of 800 on the Scholastic Aptitude Test (SAT) in order to be admitted to a professional teacher training program.

State Establishes New "High Tech Centers"

Teams of business people, educators, labor leaders and state officials met during October 1983 to begin laying the groundwork for new "high technology centers" in Kansas City and St. Louis. With funding authorized by the General Assembly earlier in 1983, the Department of Elementary and Secondary Education coordinated planning and development for the centers—subsequently established at The Metropolitan Community Colleges of Kansas City and the St. Louis Community College. The two centers were formally dedicated in the fall of 1984.

Described by Gov. Bond as "one-stop shopping centers" for business and industry, the Resource Centers are intended to provide a link between high-tech business and the state's educational resources; and to serve as clearinghouses for information and resources related to economic development activities in the two metropolitan areas.

Accreditation Standards Approved for Early Childhood Education Programs

In December 1983, the State Board of Education approved voluntary accreditation standards for early childhood education programs in Missouri. The standards are intended to recognize and promote excellence in programs for children between the ages of 2½ and 6. The accreditation guidelines will be used in addition to the Board's existing minimum standards for classifying school districts as "AA" or "AAA."

The voluntary accreditation process also will be made available to private preschool, kindergarten and day care programs in the state through an independent agency known as the Missouri Board for Voluntary Accreditation of Early Childhood Education Programs. The St. Paul Companies, Inc., a financial services firm based in Minnesota, awarded a $21,000 grant to the Missouri Association for the Education of Young Children (AEYC) to help launch the independent accreditation board. The accrediting board, housed at Stephens College in Columbia, will use the standards approved by the State Board of Education in evaluating private programs and centers which seek the voluntary "stamp of approval."

"Although strictly voluntary, the new accreditation process is a way of promoting quality programs for all youngsters," said Mildred Winter, director of early childhood education for the Department of Elementary and Secondary Education.

Under the new accreditation standards, the State Board of Education will *not* regulate or accredit any private early childhood programs in the state, Mrs. Winter emphasized. The process is not a substitute for, nor an alternative to, "licensing." The Board-approved standards, she said, "are a step above minimum licensing requirements, with a primary emphasis on the quality of educational programs."

Gifted Students Compete in First Statewide Problem Solving Bowl

A team of fourth, fifth and sixth graders from the Webster Groves School District won top honors in Missouri's first statewide Future Problem Solving Bowl, held April 14, 1984, in Jefferson City. The Webster Groves team, coached by Cecilia Darby, represented Missouri in the National Future Problem Solving Bowl, held at Cedar Rapids, Iowa, during May.

Ten teams from school districts across the state competed in the event which is designed to involve gifted students in creative thinking, problem solving, communication, teamwork and research. In the final competition, students dealt with the problem of disposing of nuclear waste. They had two hours, working by themselves, to brainstorm about possible solutions, evaluate their ideas, select the most promising one and write a description of their best proposal. In a separate phase of the competition, students presented a skit designed to "sell" their idea to a team of judges.

The Future Problem Solving program, in which schools participate throughout the year, was sponsored by the Department of Elementary and Secondary Education and the Gifted Association of Missouri (GAM).

Secondary Schools Earn National Recognition

Five public schools in Missouri received national honor during June in the 1984 Secondary School Recognition

Program, conducted by the U.S. Department of Education. The Missouri schools were among 202 public secondary schools across the nation that were selected for the honor.

The purpose of the Secondary School Recognition Program, established in 1983, is to honor outstanding American schools and identify those which can serve as examples of excellence.

Missouri schools chosen for the honor in 1984 were: *McCluer North High School*, Ferguson-Florissant School District; *Brentwood Jr. High School*, Brentwood School District; *Ladue Jr. High School*, Ladue School District; *Lewis Middle School*, Excelsior Springs School District; and *Pattonville Heights Middle School*, Pattonville School District.

Eighth Graders' BEST Scores Improve in 1984

Missouri eighth graders showed improvement in several areas of the Basic Essential Skills Test (BEST) during 1984, according to a report presented to the State Board of Education in June.

Nearly 60,000 eighth graders took the BEST between March 1 and March 15. Another 50,500 students in grades 9-12 also took one or more sections of the test which they had failed previously.

Three-fourths of the eighth graders tested passed all three parts of the written test, compared with 72.6 percent in 1983. Overall state statistics for 1984 showed that 95.8 percent of public high school seniors, out of a reported enrollment of 56,600, had passed all sections of the BEST.

The three sections of the BEST cover reading language arts, mathematics and government economics. Under a State Board of Education requirement, public schools have given the BEST to eighth graders since 1979.

Committee Begins Statewide Campaign to Promote Parent Involvement in Learning

The Commissioner's Committee on Parents as Teachers kicked off a special statewide effort to promote parent involvement in education during a press conference held April 12, 1984, at Jefferson City.

The 32-member Parents as Teachers Committee, appointed by Commissioner of Education Arthur L. Mallory in 1982, is working with state education officials to promote parent involvement in children's learning and to emphasize the crucial role parents play in guiding their children's learning during the preschool years.

The committee is composed of leading citizens and educators from across the state. Carolyn Losos, St. Louis, is chairman of the group.

During 1983-84, the committee developed (primarily with private funding) written materials and a slide program designed for parents, school officials and civic leaders. These materials emphasize the importance of early childhood development and ways schools can assist parents and children during the preschool years. The committee also developed and distributed a special series of newspaper articles, "How Does Your Child Grow and Learn?". These articles outlined important stages of child development from birth to age 5 and provided practical teaching tips for parents to use during this period.

The Parents as Teachers Committee also worked closely with education officials, Gov. Bond and other concerned groups in promoting passage of state legislation related to early childhood and parent education. The Missouri Legislature subsequently approved the Early Childhood Development Act of 1984 (Senate Bill 658) which authorizes state funding for expanded preschool services in local school districts.

The Commissioner's Committee on Parents as Teachers held a press conference at Jefferson City (April 12, 1984) to initiate a special statewide effort to improve parent involvement in education. Carolyn W. Losos, chairman of the advisory group, is seated next to Commissioner of Education Arthur L. Mallory (standing).

Part II

Reaching for Excellence

An Action Plan
for Educational Reform
in Missouri

During its March 15, 1984, meeting at Jefferson City, the State Board of Education formally adopted a special report entitled *Reaching for Excellence: An Action Plan for Educational Reform in Missouri.* The complete text of this special report is reprinted in the following section.

Developed by the State Board of Education and the Department of Elementary and Secondary Education in response to *A Nation at Risk* and other national studies which attracted widespread national attention during 1983-84, the *Action Plan* suggests "major directions and specific goals for improving Missouri's public schools." The Board's proposals include about 50 recommendations in five areas:

- Teachers & Teaching
- Instruction & Curriculum
- Access & Opportunity
- Testing & Accountability
- Finance & Support

Described by the Board as "a working agenda for the rest of this decade—at least," the *Action Plan* was distributed widely during 1983-84 to education, government, business and civic leaders throughout Missouri. The report prompted widespread discussion of educational issues and helped stimulate debate over school-reform proposals both at the state and local levels.

Some of the recommendations included in this report have already been achieved or implemented by action of the State Board of Education. Throughout the Action Plan, these items are noted with a check—✔

An Action Plan for Educational Reform in Missouri

1984
Missouri State Board of Education

Overview

The Race to Reform

We are in a race to reform Missouri's public schools. For the moment, it makes little difference if we claim to be leading or trailing; the contest has just begun. We are running against our own impatience toward a still-undefined goal: excellence in education. But we ARE in the race. More importantly, the people have been awakened and are paying attention.

It has been nearly a year (April 1983) since the National Commission on Excellence in Education published its historic report, "A Nation At Risk." In its wake, some aspects of the school-reform debate have inevitably become politicized. Certain issues ("merit pay," for example) have been oversimplified or overemphasized. The reports since "A Nation At Risk" have created a confusing mixture of facts, opinions and recommendations. Despite these drawbacks, we welcome the resurgent public and political interest in education. Because the American public has been jolted out of its lethargy about education, the race to reform public schools could become one of the major trends of the 1980s. We hope it will.

This Action Plan suggests some major directions and specific goals for improving Missouri's public schools. It repeats, in many instances, now-familiar themes from "A Nation At Risk" and other recent prescriptions for school reform. Because we do not endorse every recommendation included in all the national studies, we have outlined initiatives considered appropriate and timely for Missouri. Many of the proposals in this report also are intended to build on school improvement activities already in progress in Missouri and which we expect to continue.

Our Action Plan calls for both "reform" and "enhancement." While often similar and complementary, the two approaches can be quite different. We must recognize the distinction as we set our strategy and expectations for any long-range school improvement campaign.

The structure of our public schools and the basic patterns of daily classroom activity have changed little in the U.S. for at least 100 years. We will not abandon these familiar and accepted patterns readily—nor should we in many cases. For better or worse, the status quo in our schools is remarkably durable. As a result, too many citizens and educators have come to believe fundamental change is impossible—or not worth the effort. Despite this inertia, there is a widely held conviction that our public schools are at a critical juncture; that some practices **must** change if our schools are to solve today's problems and meet tomorrow's challenges.

Marshall McLuhan observed that "the future of the future is the present." Through reform or enhancement or both—or neither—we are making choices which will affect our students, our school system and the entire State of Missouri well into the 21st century. It is imperative that we act cautiously and correctly—not precipitously.

The Action Plan

We believe there is a strong and enduring commitment to our public school system. Missourians want and are willing to support ambitious improvement efforts. We are certain, however, that Missouri parents, taxpayers and lawmakers will not tolerate another decade of declining test scores, short-lived "innovations" and unfulfilled expectations. Therefore, a concise and tangible plan for reform is essential. We must develop a specific and realistic road map—not a wish list—for school improvement. We hope our recommendations can be a catalyst for action and, ideally, a foundation for consensus in the areas most likely to produce positive results in academic achievement and in the teaching profession itself.

The State Board of Education's Action Plan is built around five basic themes or areas of concern:

1. **Teachers and Teaching.** In recent years, the public has demanded greater accountability from teachers—more "proof" that they are adequately trained and academically competent. Standards have been raised as a result, and the trend toward stiffer requirements for teachers continues. The challenges of the future will be more complicated. Who will teach? What salary is adequate? Can we give teachers recognition commensurate with society's expectations for them?

2. **Instruction and Curriculum.** Key issues in this area range from the conditions for learning (class size and use of time, for example) to the content and quality of what is taught. This is perhaps the most complex issue we face because of the diversity and autonomy of local schools. We believe the surest way to improve overall achievement, though, is to eliminate early failure in school. Reaching this goal will require substantive changes, particularly in the primary grades.

3. **Testing and Accountability.** Parents are entitled to know the measure of their children's academic progress. Students need to know and be constantly aware of their own academic status in order to improve. The general public has a right to know whether their schools are academically effective. Traditional report cards and test scores are not sufficient to meet these needs for information and accountability. We believe the proper mechanism for meeting these needs is a comprehensive, mandatory testing program for students accompanied by a means of assessing schools' instructional effectiveness.

4. **Access and Opportunity.** To assure success for all students in the dawning era of higher standards, new programs will be needed. These include early childhood and parent education services; programs for the gifted and talented; new and expanded voca-

tional training opportunities; and more.

5. **Finance and Support.** Missouri is slipping backward in its support for public schools. The funding system is probably beyond "tuning up." The big questions: Who will pay? How much? How much is "enough" for quality education? These are political questions as much as they are financial issues. Missouri must make a long-range commitment to substantially increase its financial support for education at all levels as well as for other vital state services. At the same time, local schools must vastly improve communication with parents and citizens in order to garner the support—both moral and financial—essential to the schools' vitality and success.

Throughout this report, we note where steps have already been taken, through state-level policy revisions, to implement changes in these five areas. Although they've received little fanfare, many local school districts and teacher-training institutions also have acted in recent years to upgrade standards and improve academic productivity. We commend these efforts and will build on them wherever possible. Missouri has a running start toward school reform on several fronts, but the Action Plan we propose will not be completed quickly or easily. It is a working agenda for the rest of this decade—at least.

Reaching for Excellence

In its report entitled "Action for Excellence" (June 1983), the Task Force on Education for Economic Growth called for the formation of "new alliances among educators, school systems and many other groups in America to create **a new ethic of excellence** in public education." (Emphasis added.) This new ethic—representing a shared commitment to high educational goals and a can-do attitude about the future—is probably THE vital ingredient in any school-reform campaign for Missouri.

We believe this new spirit or ethic is increasingly evident in many Missouri communities. Moreover, this emerging trend is perhaps the best reason we have for being optimistic about the prospects for school improvement. Citizens and educators **want** excellence in their schools, and they are **talking** about it. This fact alone can have a tremendously positive impact on the attitudes and expectations of students, parents and teachers. The attention roused by "A Nation At Risk" has compelled many communities to take a closer look at their educational expectations and priorities. Today's continuing debate over education is prompting more and better communication among citizens and educators. All of these factors are encouraging.

This school year (1983-84) has been proclaimed "The Year of the Public Schools" in Missouri. The theme of this statewide observance, "Reaching for Excellence," has generated enthusiastic response among citizens, educators, students, parents and many civic groups. Coinciding perfectly with the rising interest in education, this statewide campaign has stimulated public discussion of vital education issues and focused positive attention on the noteworthy achievements of students, teachers and schools in our state.

We hope the spirit of "Reaching for Excellence" will continue far beyond the 1983-84 school year. It must if we are to sustain our momentum. Moreover, we must maintain public interest in the race to reform our schools. As we noted, the "crowd" has been awakened. This fact is nearly as important as the race itself. If nobody is around to see the finish, the race will be futile.

Indeed, the Nation and Missouri are at risk if we do not seize this opportunity to improve education and reaffirm our commitment to reaching for excellence in the public schools of our state.

Part I:

Teachers & Teaching

Any effort to improve or reform schools must involve, and ultimately depends on, teachers. Any reform program Missouri adopts will be meaningless without well-trained, devoted teachers to carry it out.

No other profession is beset by as many problems as teaching is today. The present system of training teachers, for example, is archaic in many respects and out of touch with the conditions and needs of our schools. America treasures good teaching but too seldom rewards it. Teachers are heralded as the key to the educational process but given little power to direct the process. In too many schools, teachers are treated more like the children they teach than like professionals.

The number of talented and academically able young people entering the teaching profession has declined precipitously in recent years. Large numbers of our best, mid-career teachers are deserting their classrooms either for better salaries or for occupations offering more prestige and less frustration. Criticized for their failures in the past, teachers face endless demands to work harder and take on additional duties.

The National Commission on Excellence in Education summed up conditions in the profession with this little-noticed but stinging indictment: ". . . the professional working life of teachers is on the whole unacceptable."

All of these problems have been recognized—and largely ignored—for years. These conditions can only be resolved by public recognition of the problems and cooperative action within the profession itself.

The State Board of Education has already taken a number of steps to improve standards for teacher training and certification. We believe these measures, all of which are in force or will soon take effect, constitute a solid effort to assure that Missouri's teachers are well-trained and competent. These measures include:

- Requiring prospective teachers to demonstrate academic competence by attaining specified minimum scores on college entrance exams *before* entering a teacher training program.
- Requiring prospective teachers to earn an overall college grade point average of 2.5 in order to be eligible for a teaching certificate.
- Upgrading certification requirements for all elementary teachers, all secondary teachers, all special education teachers, and all school administrators.
- Establishing procedures and criteria for evaluating and approving all teacher education programs in the state.

In carrying out its constitutional authority to establish minimum training and certification standards, the Board works closely with teacher groups as well as with colleges and universities. We will continue and strive to improve such relationships in an effort to establish and review policies which are rigorous and serve to advance the profession.

The First Step: Better Salaries

In addition to establishing higher, up-to-date standards for teacher training and certification, we believe strong initiatives are required in several other areas to improve the quality of teachers and teaching. Raising teachers' salaries to an adequate level is the first major step which must be taken in the effort to attract new teachers and to restore professional respectability. An "adequate" salary, we believe, is defined as: comparable with that in other professions requiring similar education and preparation; sufficient at the lowest level to attract top-quality young people; and progressive enough at the upper levels to reward a lifetime commitment to classroom teaching. We will continue to seek major increases in state aid to local school districts as part of our effort to improve teachers' salaries.

Missouri's effort to assure an adequate supply of top-flight teachers in all subject areas for the future also should include the following actions.

The Board Recommends:

☐ Requiring and funding a minimum start-

ing salary of at least $17,000 per year for classroom teachers, beginning with the 1985-86 school year and to be adjusted annually thereafter according to an accepted cost-of-living index.

☐ Enacting legislation to create a fund for low-interest or forgivable loans to qualified students who complete a professional education program at a Missouri college and teach for at least five years in the state's public schools.

☐ Enacting legislation to eliminate permanent teaching certificates. Life certificates should be replaced with a sequence of renewable, limited-term certificates, based on specific requirements for experience and professional development. Permanent certificates should be granted after 10 years to teachers meeting the requirements.

☐ Establishing a statewide task force to study possible changes in teacher education requirements and programs. This group, representing classroom teachers, citizens and all levels of education, should make recommendations on the following issues:

- Requiring would-be teachers to pass a test related to their teaching field before being eligible for a certificate.
- Modifying the teacher education curriculum to include significant instruction about the knowledge, teaching skills and behaviors upon which future teachers will be evaluated when they begin their actual teaching assignments.
- Strengthening teacher education in general by modernizing course content and instructional practices.
- Requiring teachers to complete a one-year internship in a regular classroom teaching position, under the guidance of a skilled teacher, before being issued a standard teaching certificate.
- Recommending changes in certification standards or teacher training programs to assure that teachers receive necessary preservice instruction in new fields or specialties such as computer education and education of the gifted.
- Modifying the curriculum for prospective school administrators to provide much greater emphasis on personnel management and supervision, and especially on clinical supervision of classroom teachers so administrators can contribute more fully to instructional improvement. Special emphasis should be placed on preparing principals to be effective instructional leaders.

The Board Recommends *(continued)*:

☐ Establishing objective, performance-based evaluation procedures for teachers, including provisions for peer review, for use by local school districts.

☐ Requiring school districts, as a condition for accreditation, to develop formal plans for inservice training, curriculum design activities and other professional development opportunities for teachers. These plans should be based primarily on the needs of teachers, as indicated by regular staff evaluations and local instructional priorities.

☐ Establishing a "career ladder" plan for classroom teachers. This program should establish categories such as "regular," "senior" and "master" classroom teacher. While recoginzing tenure and performance, these categories should also include additional professional responsibilities and compensation. The purpose of this program would be to allow teachers to remain as classroom teachers while advancing in their careers.

☐ Promoting much closer working relationships among colleges, universities and local schools in order to expand inservice training opportunities, to allow for staff-exchange activities, and to enrich clinical training experiences for prospective teachers.

☐ Encouraging school districts to issue 10- or 11-month teaching contracts in order to provide out-of-class time for professional development, curriculum review and other activities contributing to instructional improvement.

Implementing these recommendations will require a significant increase in financial support for local schools. Progress can be made in some of these areas, however, simply through the cooperation and commitment of local school leaders, teacher groups, college and university personnel and the Department of Elementary and Secondary Education.

The measures we recommend are necessary to revitalize the teaching profession, to restore public confidence in teachers, and to build morale in the present teaching force. Without action in these areas, other reforms are doomed to fail.

Part II:

Instruction & Curriculum

The terms *instruction* and *curriculum* encompass virtually everything that happens in our educational system. They describe (and often prescribe) the style and substance of what is taught in our schools. Naturally, these two broad areas must be major concerns in Missouri's campaign for school reform.

The National Commission on Excellence in Education focused on the instructional and curriculum practices in America's secondary schools. Although we agree with most of the Commission's findings, our concerns are much broader. Academic problems of high school students, for example, often can be traced directly to poor performance or inadequate preparation in elementary school. We also are concerned about the "curriculum" and "instruction" which parents provide. Although it is usually informal, the "curriculum" created by the home is far more powerful than any teaching provided at school. Clearly, parents must be viewed as primary agents, along with educators, in the quest for educational excellence.

The debate over instruction and curriculum touches a host of complex issues, including: textbooks, class size, teachers' expectations, the use of time, community standards, the structure of schools, funding and many others. The State Board of Education, however, believes the greatest strides toward improving instruction, curriculum and overall academic achievement can be made by concentrating on the following objectives:

1. Improving achievement in the primary grades.
2. Raising standards in secondary schools.
3. Using time more efficiently during the school day.
4. Expanding early childhood and parent education.

Elementary School Reform

The effort to achieve widespread, lasting improvement in education must begin, we are convinced, with major reforms in expectations and practices in our elementary schools—especially in the primary grades of kindergarten through grade 3. Without important changes at the elementary level, increasing high school graduation standards and other academic requirements will merely guarantee a higher rate of failure among our students in the future. We must attack the causes of poor academic achievement—not just the symptoms—and this will require dramatic improvements in instructional effectiveness at the primary level.

During the primary grades, students should master crucial skills in reading and arithmetic. In addition, they should develop important social skills, self-discipline and the habits which foster successful learning. All instruction in the middle and upper grades builds on these foundation skills. It is nonsense to expect schools to teach higher-order skills such as reasoning, problem solving and critical thinking—the processes which constitute true education—when a large proportion of our students fail (and are not required) to obtain essential skills in the primary grades.

Today, in many schools, the entire educational process is bogged down because so many students have not mastered requisite skills thoroughly and because teachers must spend so much time helping them "catch up."

Until we elevate the "floor of achievement" for all students—**at least in terms of basic school skills**—the slowest learners will continue to dictate the pace and content of instruction for all the rest.

We call for a revolution in expectations. While our schools cannot teach "everything" to every student, they can help every child master the essential skills which make further learning possible and enjoyable. We must **insist** that students demonstrate a reasonable level of mastery of **all** the foundation skills during the primary grades—even if it takes longer than the usual four years to do so.

Academic productivity will continue to sag as long as we tolerate the assumption that many students cannot (or will not) master essential academic skills and as long as we continue promoting students who are inadequately prepared for the next level of schooling.

For too long, we have accepted as "a fact of life" that a few students will excel, that most will perform at an "average" level, and that a few will lag behind—and eventually drop out of school. In too many places, this pervasive attitude has become an *expectation*—a destructive, self-fulfilling prophecy—which accepts widespread failure as the norm and allows mediocrity to flourish. Today, for example, nearly 30 percent of high school freshmen in Missouri do not finish school and earn a diploma. This "attrition rate" is simply unacceptable. We will not alter this gloomy statistic, however, through high school level remedial programs. Instead, schools must accept the challenge of eliminating early school failure and must insist on universal mastery of basic school skills during the elementary grades, so that success in later schooling is possible. Achieving these goals will lead, we are convinced, to a genuine renaissance in learning and a tremendous increase in the productivity of our schools. To achieve these ends, we call for the following initiatives.

The Board Recommends:

☐ Implementing an Instructional Management System (IMS) in the primary grades—especially in the areas of reading and arithmetic—as a means of specifying objectives for learning, teaching for mastery, testing for mastery, and recording progress. The IMS concept has been a priority of the State Board of Education since 1981. About half of Missouri's school districts have adopted this concept and are in the process of establishing their own management systems. We affirm our long-term commitment to the IMS concept, and we will continue to encourage the growth of this approach to instruction.

☐ Encouraging local schools to place **the mastery of language** at the heart of their efforts to define and teach basic skills to all students. We agree with Ernest L. Boyer who emphasizes "the centrality of language" in his recent book, *High School: A Report on Secondary Education in America*. He observes—properly we believe—that students "who do not become proficient in the primary language of the culture [English] are enormously disadvantaged in school and out of school as well." Language is the basis of thinking; it is the medium through which all teaching and learning occur. Therefore, mastery of language skills—reading, writing, listening, speaking and spelling—must be the core of what we call "the basics" and the first priority of the elementary school curriculum.

☐ Increasing the individual attention and instruction available to students by providing funds to enable school districts to maintain classes no larger than 15 students in kindergarten to grade 3 and no larger than 20 students in basic skills classes in grades 4-6.

☐ Requiring school districts, as a condition of classification and accreditation, to provide as much instruction as needed to assure mastery of language skills (reading, writing, listening, speaking and spelling)—with at least half of the 1,800 minutes available for instruction each week devoted to these subjects during the primary grades; and to provide a minimum of 300 minutes per week of arithmetic instruction during the primary grades.

☐ Encouraging school districts to incorporate study skills and higher-order skills (reasoning, problem solving and critical thinking) into their curricula at all levels, but especially in grades 4 and above.

☐ Establishing a state-funded program to provide school districts with free, voluntary, objective-based tests which measure academic progress in specific terms and which can be used by teachers to improve instruction.

☐ Revising and improving the elementary curriculum in science and mathematics as part of the overall effort to build interest in these subjects and to increase the number of students pursuing advanced scientific and technical studies in high school. The curriculum in these areas needs to be more "active," with greater emphasis on investigation and problem solving.

☐ Encouraging the introduction of foreign languages in the elementary grades in order to strengthen interest in languages and to provide genuine opportunities for students to achieve fluency in a foreign language.

☐ Discouraging social promotion at all levels, and particularly in the primary grades. We encourage schools to establish specific standards—at least in the basic skills—which students must meet for grade-to-grade promotion. These standards should be communicated clearly to students and parents.

Raising High School Standards

The high school diploma is the necessary ticket to full and productive participation in American social and economic life. It should symbolize the student's understanding of the knowledge and values essential for citizenship. It should signify to students and parents that graduates have had access to a sound, basic education. The diploma should certify that students are competent to pursue advanced academic or technical studies. It should assure employers that students possess the ability and knowledge to be productive and to work effectively with others.

The diploma, today, does not fulfill these essential and traditional expectations. We recommend the following actions as part of the effort—already underway—to raise standards and restore rigor in our high schools.

The Board Recommends:

✔ Adopting minimum statewide high school graduation standards which require all students to earn 22 units of credit, including: three units of English; two units each of science, mathematics and social studies; and one unit each of practical arts, fine arts and physical education.

✔ Describing a rigorous college-preparatory program of studies and issuing a special state-level certificate of recognition to those who complete the specified program at a high level of achievement.

☐ Defining standards for course content and student performance within the common core curriculum (English, math, science and social studies). These criteria for content and performance should emphasize "the centrality of language" and the importance of writing across all areas of the core curriculum.

☐ Encouraging high schools to develop innovative scheduling practices which permit advanced students to continue to be challenged, while giving slower-learning students sufficient time to succeed.

☐ Renewing the emphasis on involving students, parents and schools in planning a four-year program of studies that meets individual needs of students.

Time to Learn

"A Nation At Risk" called for a substantial increase in the amount of time available for learning by lengthening the school day and school year. We have reservations about applying this proposal across-the-board, and we recognize that this approach is opposed by many students, parents and teachers. Before investing new money in lengthening the school day and school year, we recommend a

concerted effort to use the time available more productively and efficiently. Schools, we believe, can make substantial gains in "academic productivity" by using time more efficiently and with little or no additional expense.

The Board Recommends:

☐ Restoring, as a statewide minimum, the requirement that school districts have at least 174 days of actual pupil attendance during the academic year. This requirment was eliminated by the "Labor Day Bill"enacted by the General Assembly in 1983.

☐ Studying the feasibility and impact of enacting legislation which would provide an incentive, in the form of additional state aid, for school districts choosing to extend the school year for students who need additional time to reach expected performance levels or who wish to pursue accelerated studies.

☐ Establishing reasonable local policies for daily homework and independent study. These standards should make clear to students and parents that homework is an integral part of organized, disciplined learning. We do not favor simplistic, mandatory homework requirements which turn homework into "busy work" for students and teachers.

☐ Encouraging teachers, school administrators and school boards to work together in reviewing present schedules, activities and teaching practices so they can agree on ways of reducing classroom interruptions and using instructional time more efficiently.

Home-School Partnerships:
Beginning at the Beginning

Parents are the child's first and most influential teachers. During the preschool years, children learn more and at a faster pace than at any time in their lives. This period, beginning at birth, can be richer and more important for the child's overall educational development than all the rest of formal education put together.

We believe it is time for schools to expand and intensify their efforts to work with parents and children during these crucial preschool years. The potential benefits—for families and schools alike—are enormous. Most families, for example, need (and want) timely, practical information they can use in teaching their children and fostering optimal development. By providing this kind of assistance to families, schools can help assure that children are well-prepared and ready to learn when they begin kindergarten.

Schools also have a particularly significant stake in working with preschool children who are handicapped or developmentally delayed. In many cases, these problems can be reduced or eliminated if they are detected soon enough. When these obstacles to learning remain undetected or untreated, though, children may start school with major deficits. Children who are behind from the start face an uphill struggle in school and may never close the gap—even with special or remedial education.

The research evidence is clear and convincing: Educational programs and services for parents and preschoolers are cost-effective and produce long-term academic benefits. High-quality early education programs, for example, have been shown to yield lower dropout rates and less juvenile delinquency as well as improved academic performance.

Educational services for parents and young children also can produce important, though less tangible, benefits in terms of home-school cooperation. Communication among parents and educators during the preschool years should lead naturally, we think, to improved and more constructive cooperation throughout children's formal schooling. Parent involvement is an asset for learning and should be encouraged at every level—beginning with preschool.

The State Board of Education believes that improving early childhood and parent education may be the best, smartest and least-expensive investment our state can make in the long-range effort to improve our schools. If, for example, we could assure that every child beginning kindergarten has had the best possible start in life, the educational benefits would be nothing short of revolutionary. We will have achieved a fundamental reform in education when high-quality educational assistance is available to every family and preschooler in Missouri.

The Board Recommends:

☐ Providing state funds to assist school districts with the cost of screening infants and preschoolers for possible handicaps and learning problems.

☐ Providing state funds to assist school districts in establishing voluntary, part-time parent education programs; and to help provide informational materials for parents.

☐ Providing state funds to help school districts offset the cost of providing special preschool education programs for children with handicaps or developmental delays.

☐ Providing state funds to enable the Department of Elementary and Secondary Education, in cooperation with other agencies, to supply all new parents in the state with practical information about early childhood development, nutrition, teaching tips, etc.

☐ Identifying successful, existing school programs which assist parents and young children. We will continue our efforts to encourage and assist local school districts in adopting such programs.

☐ Increasing the general public's and parents' awareness of the value of early education and the importance of parent involvement in their children's learning. We commend the efforts of the Commissioner's Committee on Parents as Teachers in this area and will continue cooperative efforts with this group of influential Missouri citizens.

Part III:

Access & Opportunity

Assuring all students access to free public education is one of the basic tenets of our Nation. Our public schools have accepted the challenge of providing our children, from preschool through young adulthood, the diverse educational services necessary to secure their futures. Our schools have been given increasing responsibility to deal with matters once outside their realm—and have received little but criticism in return. For the past 30 years, our schools have borne the responsibility for striving to achieve what the rest of society could not—racial integration and equal opportunities for all citizens.

We have made tremendous strides in this century toward guaranteeing greater access and new opportunities in our educational system for all the children of all the people. In the last decade alone, for example, great progress has been made in expanding vocational education programs and extending full educational rights to the handicapped.

Today, the issues of access and opportunity are taking on greater significance because of rapid changes occurring in the economy and because of fresh expectations created by the present school-reform movement. In addition to raising standards and attempting to improve the "educational product" in general, our schools are now expected to expand services in such areas as math, science, foreign language, computer science and others. Clearly, we are not simply striving to do **better** in public education; we are still seeking to do **more**. It will not be easy to meet these continually rising demands to assure access, opportunity—and quality—throughout our diverse school system.

Missouri is a diverse state with about 800,000 students in its public schools. Many come from home enviroments which do not engender the development of learning skills. If our schools do not intervene with preschool programs, those children will be disadvantaged throughout their schooling. More than 100,000 Missouri schoolchildren are hand-

icapped. Without special education services, they will be relegated to permanent dependence on others. More than 90,000 of our elementary students have fallen so far behind their classmates, they must have remedial instruction or they will not catch up. As many as 40,000 of our students in kindergarten to grade 12 are academically gifted. If we do not recognize their giftedness and provide programs to develop their unique talents, we will have squandered Missouri's greatest potential resource.

Missouri students and their parents have different expectations for schooling. About 40 percent of our students, for example expect to pursue a college education and need a rigorous academic program to prepare them for advanced studies. About 60 percent of our students expect to enter the work force after graduation from high school. They need a strong background in basic skills plus job-related skills which will enable them to compete in the labor market.

We have more than 500 school districts, ranging in size from fewer than 50 to more than 50,000 students. We have urban, suburban and rural school districts, each with unique problems and assets. School districts vary greatly in wealth and in their ability to provide educational services. Unless we acknowledge and deal with these differences in size and wealth, serious disparities in educational opportunities will exist for our children and youth.

We cannot disregard these differences, either in students' needs and aspirations or in school districts' needs and conditions. We must provide all children with access to programs and resources appropriate to their needs, plus opportunities for all to fulfill their academic and vocational goals.

The State Board of Education has encouraged greater access and opportunity for our children in several ways. We have a strong classification and accreditation program, for example, which requires schools to provide a diverse curriculum (special, academic and vocational-technical) as well as qualified staff, libraries and other basic resources. More needs to be done. We believe access and opportunities for students in Missouri's public schools can be enhanced through the following initiatives.

The Board Recommends:

☐ Encouraging school districts to establish programs for all educationally disadvantaged children in the primary grades, to prevent them from falling significantly behind their classmates.

☐ Initiating a comprehensive study of special education programs for handicapped children, with the expectation that recommendations for more effective and economical programs will result. It has been almost exactly 10 years since Missouri enacted House Bill 474, a law which led the country in requiring comprehensive services for handicapped children. Now is an appropriate time to review the achievements and shortcomings of special education during the past decade and to set new goals for the future.

☐ Expanding and improving vocational-technical education for adults as well as high school students. The Department of Elementary and Secondary Education is now conducting, at the direction of the General Assembly, a study of needs and priorities in vocational education. We expect this study (scheduled for completion this summer) to suggest several initiatives for the future. Due to state-level budget cuts and growing demands for services, additional state funding for vocational education will be required. In addition, our ability to meet new and fast-changing training needs of industry in Missouri needs to be improved significantly.

☐ Requiring school districts, as a condition of classification and accreditation, to identify academically gifted students at all grade levels and to provide special instruction to develop their unique talents.

✔ Seeking funds from the General Assembly to establish a "summer institute" or institutes for academically gifted students, in order to provide experiences and learning opportunities which cannot be provided within a regular school setting.

✔ Seeking funding from the General Assembly to enable the Department of Elementary and Secondary Education to employ microcomputer specialists to promote the use of computers in schools and to assist local school districts in using new technology wisely.

Part IV:

Testing & Accountability

In any discussion of our schools, the most often asked question is, "How are we doing?" That simple question has broad implications. It implies not only a concern for whether students are achieving what is expected of them, but also whether society is getting a fair return on its investment in schools. The answer to this fundamental question, "How are we doing?", is usually found in test scores.

Testing involves periodic sampling of student performance so judgments and decisions can be made about individual students, groups of students or educational programs in general. Test results are properly used for a variety of purposes: informing teachers about the progress of individual students and classes; identifying students' specific strengths and weaknesses; enabling guidance counselors to help students understand their academic needs, plan their studies and make career decisions; and helping administrators evaluate the overall effectiveness of school programs and make necessary changes. Equally important—and of particular significance today—test results can inform patrons about the quality of their schools so they can participate knowledgeably in decisions about their schools.

We believe a strong testing program and the proper use of test results are essential ingredients for an excellent school program. Establishing goals for schools and learning objectives for students are futile exercises if we are not also prepared to measure progress toward those goals and objectives, identify weaknesses and institute corrective actions on a regular basis.

The State Board of Education has encouraged the proper use of tests in our schools by developing a voluntary statewide testing program, which includes measures of achievement at all levels, and encouraging school districts to use these tests. We also have strengthened the classification and accreditation standards related to testing and evaluation by publishing guidelines for minimum and model testing programs in school districts.

We believe the following steps are needed to promote the proper and constructive use of tests in local schools and to assure the level of accountability now demanded by the public and state-level policymakers.

The Board Recommends:

☐ Expanding the current school classification program to include an "academic achievement standard" so that local districts can be evaluated, in part, on the basis of their instructional effectiveness and student achievement.

✔ Seeking funds from the Gereral Assembly to support a mandatory testing program for all pupils in grades 2, 4, 6, 8, 9 and 12 as a means of implementing the academic achievement standard and providing common data on the performance of students throughout the state.

✔ Insisting that all students obtain the minimum skills essential for productive membership in society by requiring students to pass the Basic Essential Skills Test (BEST) before they may earn high school credit in ninth grade classes related to the BEST.

☐ Promoting public accountability by emphasizing school districts' responsibility to disclose student performance trends to their communities along with plans for improving student achievement.

☐ Promoting increased use of the Instructional Management System and objective-based tests which provide students, parents and teachers with specific, understandable and practical information about students' academic status and progress.

We recognize the limitations of testing. We do not want to place more emphasis on testing than on teaching. Traditional standardized tests and report cards, however, fail to provide the necessary information which students, educators, citizens and policymakers need to make informed decisions about our schools.

The trend across our Nation is to establish higher standards and mandatory testing requirements for students and teachers. Along with this personal accountability, we believe there also must be institutional accountability. Schools must share the burden of demonstrating their performance and effectiveness.

The testing program we have proposed, along with measures to raise standards in other areas, constitutes what we believe to be an entirely new and— necessary—approach to defining and measuring progress toward academic excellence.

Part V:

Finance & Support

It comes down to this: As the National Commission on Excellence in Education noted, "Excellence costs. But in the long run, mediocrity costs far more."

Missouri now spends more than $2 billion annually (from all sources) to underwrite the total cost of elementary and secondary education. Yet, in comparison with other states, we rank near the bottom in terms of our financial commitment to education. We will need to spend more on public education in the future—substantially more—if we expect to implement the recommendations included in this Action Plan.

Ironically, at a time when we are expecting more from our schools and calling for sweeping reform, federal support for education has stagnated. State support has actually declined. Our schools are suffering from financial anemia—a situation which threatens to get worse before it gets better. Another serious problem, although it is seldom acknowledged, is that is has become virtually impossible for state and local school authorities to maintain budgets and set long-range financial priorities because of the constant threat of budget cuts and "revenue shortfalls."

It is time to reexamine our financial commitment to education and face up to the complex issues involved: What constitutes adequate funding? Are present sources of funds able to meet current and future needs? Can distribution methods be improved? Can the patchwork funding system be streamlined while assuring equity? The health of Missouri's school system depends on the resolution of these political questions.

Under the Missouri Constitution, education is a state responsibility. After retiring the state's debt, funding for education is the state's first priority according to the Constitution. Today, Missouri is neglecting this responsibility, and the percentage of general state revenue committed to education is now at its lowest point (less than 29 percent) in 10 years.

During the current school year (1983-84), state funds will cover approximately 38 percent of current operating costs in our public schools. This is well below the long-sought goal of "50/50 funding," and it represents a substantial decline from just four years ago (1980-81) when Missouri briefly reached the goal of sharing costs equally with local districts.

The ability of local school districts to compensate for shrinking state support is constrained by the two-thirds majority required to pass local tax levies in excess of $3.75. Further, it is estimated that local school districts lose as much as $500 million per year in potential property tax revenue because of inefficiency and inequity in our property assessment system. Until the impact of statewide property reassessment is fully understood, we believe the property tax is effectively "frozen" as a potential source of revenue for local schools.

The one-cent sales tax for education (Proposition C), approved by Missouri voters in 1982, has provided an important financial boost for our schools. A substantial proportion of this revenue, however, intended as a source of "new money" to schools, has been eroded and used to **replace** funds lost as a result of cutbacks in general state aid. The sales tax could be a far-more important source of aid to local schools. It has been estimated, though, that Missouri loses as much as $800 million per year in potential sales tax revenue because of exemptions to the sales tax.

Equity—not just dollars—must be another major concern as we examine our school funding system. The recently enacted "Fair Share Fund" (the 4-cents-per-pack increase in the state cigarette tax approved in 1982) has provided a modest increase in funding for schools. This money, earmarked for teachers' salaries, is distributed "outside" the equalizing formula of the Foundation Program. The same is true of sales tax revenue from Proposition C, which is apportioned to school districts from the "School District Trust Fund" and apart from the equalizing formula of the Foundation Program. Recent cutbacks in state funding have further weakened the equalizing effect of the Foundation Program—a major purpose of which is to reduce the disparity in spending among school districts. If these equity issues are not corrected, our entire school funding system is subject to legal challenge.

Is it any wonder that citizens, policymakers and educators themselves are "bewildered in the maze of schools" and confused by this tangle of taxes and technical complexities? This complexity—in and of itself—has become a major impediment to improving funding for public education.

The Other Side of the Coin

In addition to financial support, our schools depend on broad-based citizen support. Local school districts (even individual school buildings) reflect, in large measure, the aspirations and educational expectations of their communities. There must exist in each community a general understanding of the schools' goals and priorities plus a common commitment to excellence which is shared by students, parents, patrons and educators. Without this kind of shared understanding and commitment to quality education, the schools will never live up to our expectations.

In the past, public schools could rely on the natural constituency of people with school-age children for support. This is no longer sufficient. Public schools belong to, and must be accountable to, the entire community. Thus, we must seek new ways of informing the public-at-large about the activities, goals, achievements and problems of our schools.

Today, schools must **earn** public support. We recognize that increased financial support will probably not be forthcoming until taxpayers and policymakers are convinced our public schools are "back on track" and making genuine progress toward reform.

Obviously, increasing the public's confidence and sense of ownership in the schools must go hand-in-hand with our efforts to secure the funding necessary to make excellence in education a realistic goal. Improving the financial outlook for Missouri's public schools will require a joint state and local commitment. The bottom-line responsibility rests with the State of Missouri, however. We believe the following steps are necessary to guarantee adequate financial support for our schools.

The Board Recommends:

☐ Restoring, as soon as possible, all funds cut from the budget for elementary and secondary education during the past three years.

☐ Providing the funds necessary to establish

a minimum, entry-level salary of $17,000 for classroom teachers by 1985-86. Currently, we estimate that 39 percent of Missouri's 46,750 teachers earn less than $17,000 annually. Thus, it will be necessary to provide funding to raise their salaries to the entry-level amount as well.

☐ Providing, over a three-year period beginning in 1985-86, sufficient additional state aid to increase Missouri's **current expenditure per pupil** to a level equal with the national average. While Missouri's per-pupil investment has increased substantially over the past decade, our expenditures have declined sharply in comparison with the rest of the Nation. Ten years ago, for example, Missouri ranked 29th in the country in terms of per-pupil investment for education. Today, we rank 38th. During 1982-83, Missouri invested $2,400 per student in average daily attendance—$550 below the national per-pupil average of $2,950. We believe this gap must be narrowed.

☐ Seeking a constitutional amendment to authorize local school districts to pass bond issues for school construction, maintenance and renovation with a 60 percent majority vote instead of the current two-thirds majority requirement.

☐ Conducting a major review of Missouri's Foundation Program and other funding sources, with the goal of recommending revisions which will improve and simplify the mechanism while assuring equitable funding for all local school districts. This study can be conducted by the State Board of Education's School Finance Study Committee, or by a specially appointed task force. In any case, the goals of such a study must have the support of the governor and legislative leaders for the effort to be most productive.

☐ Increasing the operating funds of the Department of Elementary and Secondary Education. The state education agency provides leadership for the state and serves a necessary regulatory function in assuring statewide financial and instructional accountability. Some of the proposals included in this Action Plan will require additional staff and administrative funds at the state level. The Department of Elementary and Secondary Education, along with all other state agencies, must have sufficient funding to attract and retain experienced, competent staff.

☐ Assuring continued autonomy for local school districts. We recognize the delicate balance of governance which exists in our public school system. Although education is a basic state responsibility, much authority for operating our schools rests with local school boards. By recommending substantial increases in state financial support for schools, it is not our intention to eliminate local autonomy by concentrating the power of the purse strings at the state level. It is the prerogative—indeed, the duty— of the State Board of Education and the General Assembly to establish educational goals and consistent criteria for school districts throughout the state. The principle of local autonomy, however, has been a traditional characteristic of our public school system. It is a principle which must be guarded.

☐ Encouraging and assisting local school districts to communicate more effectively with their patrons and to seek stronger partnerships with business and industry. We call on individual educators as well as the professional associations to make a strong commitment to improving communication and increasing the number of Missourians who have positive personal contact with their schools. We also encourage parents and citizens to participate actively in the PTA and other organizations which offer opportunities for involvement.

A Vision of the Future

This Action Plan suggests an ambitious campaign, on many fronts, to improve Missouri's public schools. We recognize that financial constraints and the controversy generated by some of our proposals will be formidable barriers to attaining the goals we recommend. These realities, however, must not constrain our will to create a vision of the educational system we need and desire for the future. We assume Missouri will recognize and fulfill its obligation to provide adequate, equitable funding for public education. Our immediate challenge, therefore, is to establish the goals and priorities which will supply the necessary energy—and incentive—for our race toward school reform.

Excellence is a rare quality and an elusive goal. We can achieve it only by reaching for it. Indeed, we must **create** it—through programs, policies and the personal commitment of citizens and educators which will give substance to our vision of the future.

LIST OF TABLES AND GRAPHS

28 **Financial Data:**

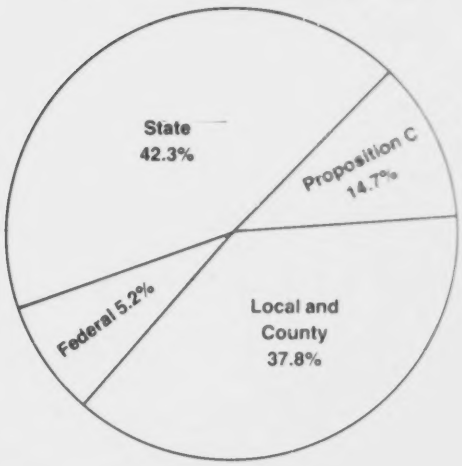
Statewide Statistics

GRAPH I
Receipts—By Sources Available for Use for Current Expenditures 1983-84



GRAPH II
Revenue and Non-Revenue Receipts in Public Schools 1983-84

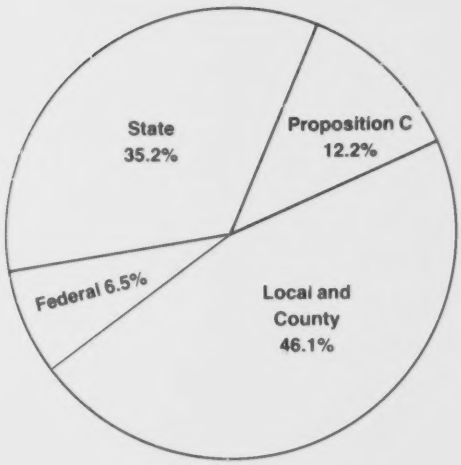


TABLE 1a
RECEIPTS—BY SOURCES AVAILABLE FOR USE FOR CURRENT EXPENDITURES—1983-84

Sources	Amount	Percent
Local and County[1]	$ 740,273,679	37.8%
School District Trust Fund (Proposition C)*	288,202,986	14.7%
State[2]	828,282,752	42.3%
Federal[3]	101,356,561	5.2%
Total	$1,958,115,978	100.0%

*Adopted by initiative, Proposition C, November 2, 1982.

Formula:

Part A. 1. Local and County from Part B-1, plus result from Part C.
2. State from Part B-2.
3. Federal from Part B-3.

Part B. Incidental and Teachers Fund
1. Local, Part II, 5199 plus 5299 in columns one and two minus 5123 and 5180 in one and two; minus 6510, 6520, 6530, 6541, 6542, 6551, 6552, and 6590 on Part III C, column 1; minus 5150 on Part II, column 1; minus 5170 on Part II, columns one and two.
2. State, Part II, 5399, columns one and two minus 5371 on column one.
3. Federal, Part II, 5499, columns one and two minus 5436 in column one; minus 1.2 percent of 5411, 5429, 5432, 5433, 5434, 5435, and 5440 in columns one and two.

Part C. A portion of Building Fund that is current (III C, column four, 6510 plus 6520, plus 6530 plus 6541 plus 6542 plus 6551 plus 6552 plus 6590 plus 6620).

Less Part II, column four, 5610 plus 5690, 5499, 5399. If negative, erase number and go to Part A. If positive, subtract this value from Part II, column four, 5111 plus 5112 plus 5113 plus 5114 plus 5140 plus 5190 plus 5221 plus 5231. If result negative, erase number and go to Part A. If positive, save number and add to Part A.

District data available in Table 4, Part IV.

SUMMARY OF SHORT-TERM BORROWING 1983-84

Description	Amount
Balance, Beginning-of-Year	$ 27,744
Borrowed During Year	9,489,450
Repaid During Year	9,475,686
Balance, End-of-Year	$ 41,508

TABLE 9a
FOUNDATION PROGRAM APPORTIONMENTS AND PAYMENTS SINCE 1976

Year	Total Foundation Program	Basic Apportionment*	Special State Aids		
		Prorated Minimum Guarantee	Transportation	Exceptional Pupil	Gifted
1975-76	$407,154,428	$345,919,507	$28,018,708	$33,216,213	0
1976-77	428,839,659	364,237,873	28,332,480	36,269,306	0
1977-78	480,839,450	397,297,810	41,582,341	41,959,299	0
1978-79	526,839,692	430,421,663	46,095,538	50,322,491	0
1979-80	593,578,545	482,580,418	53,244,692	56,314,835	$1,438,600
1980-81	683,617,059	550,889,554	65,241,138	65,403,593	2,082,774
1981-82	707,611,141	564,197,662	71,024,374	69,777,049	2,612,056
1982-83	697,600,408	558,551,154	69,531,417	66,747,185	2,770,652
1983-84	705,988,914	562,595,462	72,329,897	67,470,751	3,592,804

*The minimum guarantee portion of the Foundation Formula was prorated at 154.955 percent in 1975-76 and 174.762 in 1976-77. The 75th General Assembly changed the Foundation Formula so that minimum guarantee was apportioned with an adjustment of zero and the distribution was made on .983727 proration factor for 1983-84.

TABLE 9b
FAIR SHARE AND PROPOSITION "C" PAYMENTS

Year	Fair Share*	Proposition C**
1982-83	$18,572,152	$ 78,627,059
1983-84	25,865,849	288,621,580

*Fair Share Fund is 4¢ tax on cigarettes.
**School District Trust Fund is 1¢ Sales Tax—Note that ½ of this money is to offset lowered current tax revenue and is not "new" revenue.

TABLE 10
EXPENDITURE FACTORS

Year	Eligible Pupils	Current Expenditures	SEF
1976-77	885,175.66	$1,112,595,510	$1,256.92

*Resident I data indicate attendance in home districts.
Resident I plus Resident II data plus Part-Time and Summer School equal total state ADA.
†Resident II data indicate attendance outside home district.
‡Kindergarten pupil attendance—two sessions equal one day attendance.

TABLE 37
SUMMARY OF COURSES OFFERED IN SUBJECT MATTER FIELDS

Number of Course Titles: There is a listing of course titles for each major area published each year (see Table 36). This number is the aggregate of that listing by area.

Duplicated Count of Students: If a student is enrolled in more than one course in a major area, the student will be counted for each course.

Percent of 9-12 Students Enrolled: This is the ratio of students enrolled in the major areas divided by fall state enrollment for 9-12 grades. The comparison of years shows activities of areas.

Year	# of Course Titles	Duplicated Count of Students	% of 9-12 Fall Enrollment
Agriculture			
83-84	28	22,793	9.1

Deaf/Blind	66	13.00	129,363.
Totals	107,315	8,588.50	$60,810,566.

*Effective FY 1982 Remedial Reading no longer administered by Special Education Section and not in totals.
NOTE: Approved amount was funded at .991151919% during the 1983-84 school year. The above data does not reflect the short-fall in funding.

b. State Schools for Severely Handicapped—Statistical Summary

Attendance Schools	Aggregate Days Membership	Days in Session	A.D.M.	Total Days Attendance	A.D.M.	No. Pupils Transported
51	402,942	174	2,315.8	354,226	2,035.8	2,487

During the fiscal year 1984, 80 workshops paid 4,890 handicapped workers total wages of $5,973,602.06 averaging $.90 per hour. State aid paid to those workshops totaled $6,130,134.

C. MISSOURI SCHOOL TRUST FUNDS

Section 162.790 (5) RSMo., authorizes the State Board of Education to accept grants, gifts, donations, or bequests for the use of the Missouri Schools for the Blind, for the Deaf, and for the Handicapped Children to deposit same in the Schools' Trust Fund in the State Treasury, or to invest such funds in stocks, bonds, deeds of trust, or any other investment securities in the amounts and in the proportions that the State Board of Education prudently selects.

The act further provides that "moneys in the School for the Blind Trust Fund or in the School for the Deaf Trust Fund or the School for the Handicapped Children Trust Fund shall not be appropriated for the support of the schools in lieu of general state revenues but shall be appropriated only for the purpose of carrying out the object for which the grant, gift, donation, devise or bequest was made," as recommended by the State Board of Education.

a. SCHOOL FOR THE DEAF TRUST FUND
BALANCE SHEET
June 30, 1984

Assets		
Cash in bank—Boatmen's National Bank of St. Louis		$ 450.68
Cash in bank—State Treasury		1,720.31
Investments:		
Sears Roebuck Acceptance Corp. Variable Interest Note	$ 5,000.00	
Government Bonds (M/V—$105,696.70)	109,777.60	
Total Investments		114,777.60
Furniture, Fixtures and Equipment		19,548.42
Total Assets		$136,497.01
Fund Balance		
Fund Balance		$136,497.01

b. SCHOOL FOR THE DEAF TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1983—June 30, 1984

Balance, July 1, 1983		$124,614.33
Add:		
Interest Received	$ 11,429.20	
Cash Gifts—Estates	1,200.00	
Gain on Sale—Investments	102.47	12,731.67
Less:		
Bank Fees	$ 698.99	
Memorial Expenses	150.00	848.99
Fund Balance, June 30, 1984		$136,497.01

c. HANDICAPPED CHILDREN TRUST FUND
BALANCE SHEET
June 30, 1984

Assets		
Cash in bank—Boatmen's National Bank of St. Louis		$ 47.26
Cash in bank—State Treasury		1,605.15
Investments:		
Sears Roebuck Acceptance Corp. Variable Interest Note	$ 3,000.00	
Government Bonds (M/V—$80,306.15)	84,861.40	
Total Investments		87,861.40
Total Assets		$89,513.81
Fund Balance		
Restricted Fund Balance*		$25,388.31
Unrestricted Fund Balance		64,125.50
Total Fund Balance		$89,513.81

*Restricted as follows: $3,790.05—Maple Valley State School, gift of Gladstone Fraternal Order of Police. $20,275.80—B. W. Sheperd State School, gifts from Adele S. Holt Estate ($6,082.74), James Lynn Estate ($2,635.85), and Peppin Estate ($11,557.21). $1,322.46—State School No. 18, gift from Rosa B. Clark Estate.

d. HANDICAPPED CHILDREN TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1983—June 30, 1984

Balance, July 1, 1983		$80,138.66
Add:		
Interest Received	$ 8,368.40	
Cash Gifts—Estates	1,499.39	
Gain on Sale	50.45	9,918.24
Less:		
Bank Fees	$ 543.09	543.09
Fund Balance, June 30, 1984		$89,513.81

e. SCHOOL FOR THE BLIND TRUST FUND
BALANCE SHEET
June 30, 1984

Assets		
Cash in bank—Boatmen's National Bank of St. Louis		$ (3,647.51)
Cash in bank—State Treasury		60,032.50
Investments:		
Variable Interest Notes	$ 168,000.00	
Government Bonds (M/V—$1,617,486.33)	1,683,713.76	
Corporate Bonds (M/V—$428,783.45)	599,968.75	
Common Stocks (M/V—$1,135,756.65)	713,927.75	
Total Investments		3,165,610.26
Furniture and Fixtures		180,854.91
Land and Buildings—Recorded at Cost		625,137.98
Total Assets		$4,027,988.14
Fund Balance		
Restricted Fund Balance*		$ 20,000.00
Unrestricted Fund Balance		4,007,988.14
Total Fund Balance		$4,027,988.14

*Restricted as follows: To assist graduates in starting life on self-supporting basis. Gift from Eula E. Reynard Estate

f. SCHOOL FOR THE BLIND TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1983—June 30, 1984

Balance, July 1, 1983		$3,440,272.87
Add:		
Cash Dividends	$ 55,472.28	
Interest Received	218,551.29	
Cash Gifts—Estates	311,881.27	
Stock Gifts—Estates	68,994.87	
Gain on Sale—Investments, Land & Building	8,661.54	663,561.25
Less:		
Loss on Sale—Investments, Land & Building	$ 1,105.34	
Bank Fees	8,365.37	
Office Supplies	1,466.91	
Repair & Maintenance	4,411.74	
Miscellaneous Expense	31.08	
Therapeutic Expense	23,495.71	
Instructional Expense	4,960.33	
Filing Fees	9.50	
Activity Account	32,000.00	75,845.98
Fund Balance, June 30, 1984		$4,027,988.14

TABLE 41
VOCATIONAL REHABILITATION
A. Summary Data for Year Ending September 30, 1984

Persons Served and Rehabilitated		Average Cost	
Per Case Served	Per Case Rehabilitated	Served	Rehabilitated
36,183	5,774	$769.59	$4,822.66

B. Services and Cost to the 5,774 Clients Rehabilitated

Services	Number of Clients with Cost	Total Cost*
All Services*	5,477	$11,860,570

*The costs represent only amounts spent for services purchased by the agency. Some services have been obtained free of charge or may have been paid for, wholly or in part, by other organizations, interested individuals or by the client himself. Excludes cost of administration, counseling, guidance and placement.

C. Jobs After Rehabilitation

Professional, Technical & Managerial Occupations	809
Clerical and Sales Occupations	838
Service Occupations	1,359
Farming, Fishery, Forestry, & Related Occupations	137
Industrial Occupations	1,651
Work in Sheltered Workshops	611
Homemakers (own home) and Other Unpaid Family Workers (own family)	369
Total	5,774

D. Earnings At Referral and at Closure for 5,774 Rehabilitants

Weekly Earnings at Referral	Number of Rehabilitants	Weekly Earnings at Closure	Number Rehabilitants
None	4,951	None	406
$01-19	44	$01-19	572
$20-39	89	$20-39	415
$40-59	85	$40-59	244
$60-79	102	$60-79	328
$80-99	68	$80-99	225
$100+	435	$100+	3,584
Average weekly earnings at referral	$ 15	Increase in average weekly earnings	$117*
Average weekly earnings at closure	$132		

*With an increase in average weekly earnings of $105 for the 5,774 rehabilitants, the total annual increase in earnings would amount to $35,129,016.

TABLE 42
TESTING AND ASSESSMENT
PROGRAM DATA

A. Summary of 1983-84 BEST Test

BEST	Percent Passing Test
Reading	94.6
Math	80.0
Govt./Econ	86.9
All Three Subtests	74.9

Passing Criteria: At least 1 of 3 items correct on each of the 13 objectives and at least 75 percent of the subtest items correct.
Testing Dates: March 1-15, 1984
Number of eighth graders included in this analysis—59,893
Total number of eighth grade students—64,535

B. BEST Reading/Language Arts Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Identification and interpretation of medical terms	99.9	99.1	89.4
2. Identification and interpretation of labels and symbols	99.9	99.5	95.9
3. Interpretation of consumer vocabulary terms	99.7	98.4	89.9
4. Proper response to commonly used signs	99.9	99.2	92.7
5. Use reference materials and sources to obtain information	99.8	98.2	84.7
6. Recognize main ideas	99.1	93.9	68.9
7. Note purpose of writer	99.4	96.1	79.6
8. Recognize a correctly completed form	99.7	97.4	75.9
9. Interpret business correspondence and contracts	99.4	95.5	72.4
10. Identify information in various sections of a newspaper	99.7	98.2	90.7
11. Interpretation of common documents (menu, ballot)	99.4	96.4	77.3
12. Follow written directions	99.3	97.4	89.5
13. Interpretation of graphic information	99.1	94.0	70.3
Number of students tested:		59,611	
Number of students passing this subtest:		56,419	(94.6%)

Locally Administered Objectives	Percent Passing
14. Speak effectively in business and social situations	94.7
15. Write sentences using acceptable grammar, punctuation, and spelling	91.6
16. Use reference materials and sources	94.4
17. Recognize main idea and details of an oral presentation	93.6
18. Complete a business form correctly	94.5
19. Communicate by reading orally	95.3
20. Locate parts of a newspaper	93.9
21. Follow oral and written directions	94.7
Number of students passing	50,557 (84.4%)

C. BEST Mathematics Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Addition and subtraction of whole numbers	99.9	99.3	91.6
2. Multiplication and division of whole numbers	99.7	98.5	90.6
3. Addition and subtraction of fractions	99.8	98.9	92.5
4. Multiplication and division of fractions	99.5	97.2	83.9
5. Business and consumer transactions	95.2	78.3	46.4
6. Measurement of perimeter, area and volume	92.7	75.5	48.3
7. Measurement of time and temperature	98.2	89.1	55.5
8. Interpret charts, graphs, tables, maps, scale drawings	99.6	97.4	75.7
9. Ratio and proportion	98.0	88.8	66.2
10. Interpret probability and statistical statements	98.3	92.0	71.3
11. Determine averages	97.5	88.6	68.7
12. Identify horizontal, vertical, parallel, intersecting lines	98.5	92.4	66.4
13. Identify simple plane and solid geometric figures	99.9	95.0	82.1
Number of students tested:		59,621	
Number of students passing this subtest		47,691	(80.0%)

Locally Administered Objectives	Percent Passing	
14. Measure length, volume, weight, time and temperature	93.1	
15. Estimate results and answers to computational problems	93.4	
Number of students passing	54,361	(90.8%)

D. BEST Government/Economics Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Understand terms such as "democracy"	99.7	97.5	84.7
2. Understand process of making, enforcing, interpreting laws	97.2	87.6	55.8
3. Understand rights guaranteed to a citizen	99.0	94.7	76.6
4. Recognize limits on individual rights and freedoms	99.4	95.3	71.8
5. Understand basic responsibilities of citizenship	99.5	98.6	94.6
6. Understand roles of government officials	98.4	87.7	54.1
7. Understand factors related to production of goods and services	99.4	96.0	79.8
8. Understand and apply information about how private business functions	99.0	94.6	77.6
9. Understand how government functions in U.S. economy	99.1	93.8	69.5
10. Predict how change in economy will result in other changes	98.4	93.8	76.0
11. Make rational personal economic decisions	98.2	91.0	71.1
12. Recognize the rights and responsibilities of consumers	99.1	95.7	85.8
13. Understand use and handling of money and investments	97.8	92.7	78.1
Number of students tested:		59,515	
Number of students passing this subtest		51,725	(86.9%)

E. Statewide Twelfth Grade Assesement Results—October, 1983

Goal / Subgoal	1983 Average Percent Correct	1975 Average Percent Correct
I. Intellectual Development

Reading

Objective Statement	% Mastered	% of Correct Responses for each item		
Domain—Word Analysis				
1. Indicate the letters that are silent within a word	67	83	80	88
2. Indicate words that are synonyms	23	75	55	44
3. Indicate words that are antonyms	27	66	60	49
Domain—Factual Comprehension				
4. Choose the correct meaning of the prefix in a given word	26	72	47	60
5. Choose the correct meaning of the suffix in a given word	53	91	76	66
6. Use context to determine the meaning of a word in a sentence	14	59	45	41
7. Use semantics and context clues to determine the meaning of a word with multiple meanings	55	85	75	71
8. Recognize the main idea of a passage when stated explicitly	37	84	49	72
9. Identify the sequence of events in context	41	81	58	69
Domain—Interpretive and critical comprehension (in a passage)				
10. Recognize the main idea (inferred) in a paragraph	37	60	74	63
11. Draw conclusions	36	66	54	84
12. Interpret emotional reactions expressed in the passage	22	52	64	47
13. Identify inferred cause and effect relationships	32	57	63	68
14. Use context to determine the meaning of similes	28	36	78	88
15. Use context to determine the meaning of metaphors	21	52	41	67
16. Use context to determine the meaning of personifications	15	34	39	79
17. Distinguish fact from opinion	58	77	70	82
18. Interpret the meaning of idioms	57	88	64	87
Domain—Study Skills				
19. Use of reference materials (index, dictionary, encyclopedia, etc.)	38	55	86	68
20. Use the key/legend to answer specific questions about a map	15	72	54	25
21. Establish purpose for reading	22	66	40	61
22. Outline material	24	71	57	39
23. Analyze product to fit a specific need	41	60	72	69
24. Locate information by using a time line	30	50	59	76
25. Finding information using a graph	29	67	68	48
26. Finding information using a schedule	14	56	46	40
Domain—Functional Skills				
27. Using the classified ads	22	54	58	55
28. Reading hazard warning labels on household products	18	68	34	53
29. Locating specific information	26	75	40	67
30. Applying real-life skills	13	56	51	33

Average number of objectives mastered = 9.4
Average percent of objectives mastered = 31
Average percent of correct responses = 62
Number of students tested = 15,857
Mean raw score = 55.87
Standard Deviation = 15.54
Mastery = 3 of 3 items correct for an objective

Mathematics

Objective Statement	% Mastered	% of Correct Responses for each item		
Domain—Numeration				
1. Determine place value of numerals through millions	53	70	73	77
2. Read any numeral, using expanded notation and exponents	21	77	39	51
3. Round numbers to the nearest whole and decimal number	32	57	62	58
4. Decimal notation	27	67	64	50
Domain—Computing whole numbers				
5. Addition	58	91	87	66
6. Subtraction	57	70	85	77
7. Multiplication	50	85	80	59
8. Division	44	76	70	57
Domain—Fractions				
9. Identify fractions, improper fractions, and mixed numerals	54	76	73	73
10. Add unlike fractions and express answers in simplest form	36	47	73	60
11. Subtract unlike fractions and express answers in simplest form	31	64	52	49
12. Multiply fractions and express answers in simplest form	23	54	45	52
13. Divide fractions and express answers in simplest form	25	50	47	44
14. Give the percent for a fraction	14	56	29	21
Domain—Computation of decimals (add, subtract, multiply, divide)				
15. Solve decimal problems of addition and subtraction	49	63	72	74
16. Solve decimal problems of multiplication and division	40	68	67	60
17. Solve decimal problems using percents	10	48	35	32
Domain—Solving word problems (functional math)				
18. Select appropriate mathematical operation to solve word problems using money	17	58	70	33
19. Determine the average for given data	23	37	51	65
20. Interpret simple mathematical statements relating to common situations	11	66	41	31
Domain—Graphs, time and measurement				
21. Interpret data on a graph	9	33	26	68
22. Interpret word problems involving time	14	55	32	62
23. Solve word problems involving distance	29	56	56	72
Domain—Geometry				
24. Find the perimeter and/or the area of any simple polygon	33	80	65	47
25. Identify intersecting and parallel lines and congruent shapes	45	59	81	79
26. Interpret the measurement of angles	10	19	64	53
27. Find the volume and surface area	5	29	47	13
Domain—Ratio, proportion, probability, and symbols				
28. Solve problems by applying the concept of ratio and proportion	28	83	61	41
29. Interpret simple probability	27	56	66	51
30. Use of symbols in equations and inequalities	31	73	55	51

Average number of objectives mastered = 9.1
Average percent of objectives mastered = 30
Average percent of correct responses = 58
Number of students tested = 15,857
Mean raw score = 52.13
Standard Deviation = 16.31
